

Sale Name: 48th Anniversary Auction - Day 3 Military, Taxidermy & Ammo

LOT 4193 - African Roan Antelope Taxidermy – SUPER RARE

Description

This is a super rare taxidermy African Roan antelope. Ask any African hunter, and he will tell you how hard it is to get a Roan. Good luck finding a life size taxidermy specimen. It is rare to even find a shoulder mount. This particular life size specimen is very clean. It has removable horns for easy transportation. Any wealthy collector can locate a rare polar bear rug, tiger, African lion, 80 inch moose, Cape Buffalo with 17 inch bosses, 200 inch bighorn sheep, Markhor, Golden Takin, or 400 inch elk, but try finding a life size Roan. A lot of museums don't even have one of these. We can help you find a 3rd party transporter to get this to you. H: 80 in L: 87 in W: 29 in Ref #: 5103

Quantity: 1
